

# F2 for Paperless Ministerial Management

## Functionality

cBrain has developed a tool to digitize the internal case management of different government approvals by expanding the standard F2 system with a workflow module that enables support and automation of subject-specific administrative approval processes.

## Key Benefits

The workflow module enables government officials to work digitally and to have the executive level make all requests and approvals on iPads, as well as to have all meeting documents uploaded to the cases relevant to them. The solution helps achieve an automatization of hundreds of different types of approvals across online platforms and on the move.

## Software

Fully integrated solution with database, user and role access control, case management, records management, communication, management reporting, requests and approvals.

### Project time

Total project time from design to go live: 1 month

## About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes.

A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

## About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software.

We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
