

F2 for Ministerial Meetings and Approvals

Functionality

Transform operational workflows, reduce IT costs, and improve the job satisfaction of civil servants with the F2 digital public administration platform. The platform has improved the productivity of Denmark's ministries through an integrated workflow that supports case processing, collaboration, knowledge sharing, document management, archiving and records management. Specific workflows are in place to handle ministerial correspondence and show which tasks have been allocated to the different units. An approval workflow shows submissions that are on their way for approval for the Permanent Secretary or Minister. Staff can follow tasks online instead of tracking them with spreadsheets or emails.

Key Benefits

The transparency has helped improve user satisfaction. It is unusual for employees to admit they are happier two months after the introduction of a new case management system, but 96% percent said they thought transparency had improved with the new system.

Average case processing time was reduced by a third, along with savings in printer and photocopier usage.

Civil servants can follow the document's progress in real-time, right up to the Permanent Secretary and Minister and back. Turn waiting time or transport time into productive time with the F2 Manager app. The Ministry of Transport won the national Digitization Award for their implementation of F2.

Software

Based on F2 standard system, we deliver an integrated workflow that supports case processing, collaboration, knowledge sharing, document management, archiving and records management.

About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes.

A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software.

We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
