cBRAIN

F2 for Managing Research Ethics

Functionality

The solution ensures effectively and efficiently to manage detailed contractual negotiations and related communications throughout the lifecycle from application to award, covering areas such as the terms and conditions and the scheme and ethical implications.

Key Benefits

The solution provides guidelines for the responsible conduct of research, and it can monitor the scientists conducting research to ensure a high ethical standard.

Software

Build on the F2 core, a checklist is added as a workflow, to ensure that all scientists follow the same process, and that all steps are followed to submit a research. Functions can also be added to conduct further checks during the process to prevent misuse of funds.

Project time
Total project time from design to go live: 5 months

About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes. A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software. We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
